

## Notes on tables

---

All estimates in the CD-ROM are expressed in thousands, with the exception of rates and averages (e.g. average number of hours worked, average duration of unemployment, average job tenure and average wage rates).

Some detailed data are suppressed to ensure respondents' confidentiality (see the *Guide to the Labour Force Survey* for the different levels of suppression).

Suppressed cells appear as "0.0" in the tables, while true zeros or unavailable data are expressed with "-".
